

## Study Overview

**243**

Facilities

**8**

Scenarios

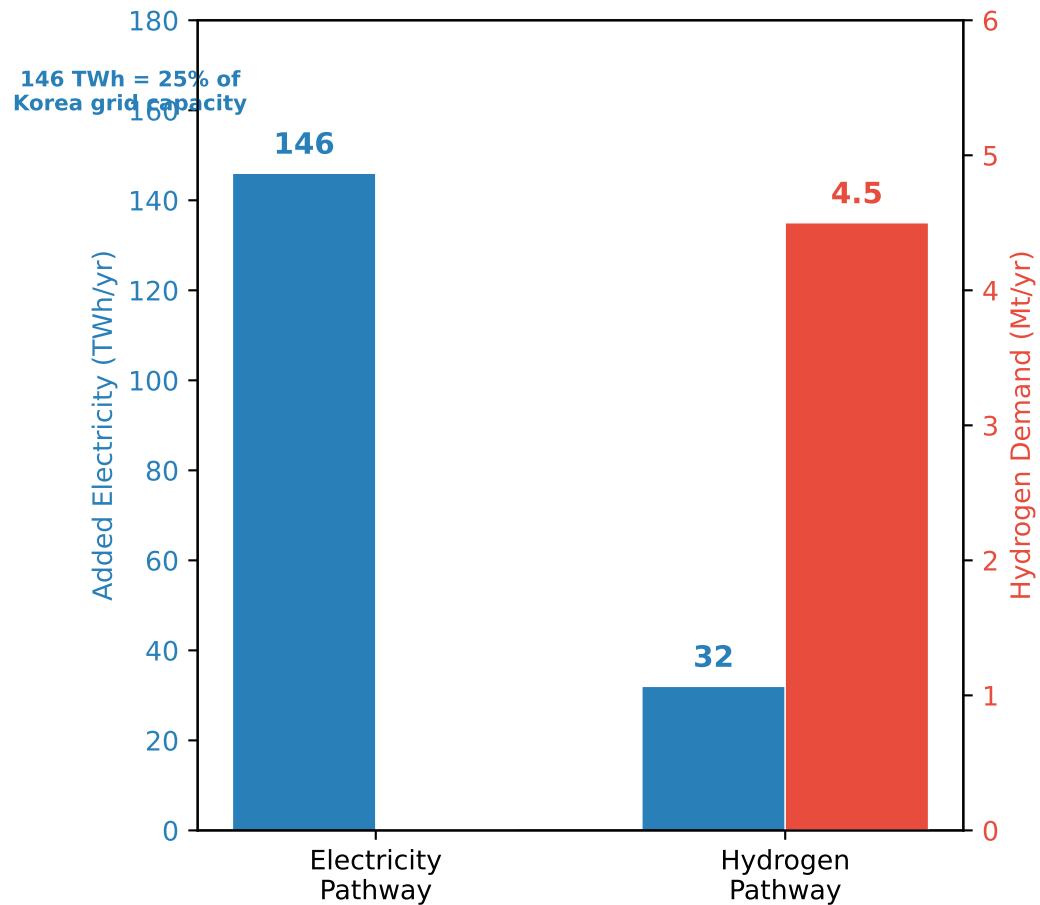

**2025-2050**

Time horizon

**South Korea**

Petrochemical sector

## Infrastructure Tradeoff (2050)

## Key Findings

**93-98%**

of costs are  
energy costs

**~400 BUSD**

cost difference from  
energy price alone

**+68%**

cost premium under  
infrastructure constraints
